OPERATION:

- **NOTE FOR SHOWER #6: Not for use as anti-ligature device.**
- PAUSE warning—for T13H9, T13H3 & optional handshower #2

Plumbing Codes req. that showerheads and handshowers provide a small but continuous flow of water (trickle) when in "PAUSE" mode

- Because of this, pressure variations in the water line and/or changes in the position of the shower temp. control handle while in "PAUSE" mode could result in dramatic changes to the temp. of the water when the shower head or hand shower is returned to the "ON" position.

ALWAYS point the shower head away from yourself when returning to the "ON" position and feel the water with your hand before resuming your shower to ensure the water flow is not too hot or too cold.

DO NOT allow children or others who might not understand this warning to use the "PAUSE" function.
