

(#3006 Packaging)

ACCESSORIES

Lambro manufactures many different clothes dryer venting accessories. If you have minimal space between the back of the clothes dryer and wall then we have your solution. Try our Tite-Fit or Dryer Wall Box products which allow for tight space clothes dryer installations such as laundry closets. Our high quality galvanized worm gear clamps get the job done without binding when tightening. Other accessories include smooth interior surface dryer elbows, heat saving inline dampers and a inline damper to prevent hot or cold air from entering the duct.
