

Product Description

The Rheem SP10763C Ignition Control Module is essential for gas water heaters, ensuring reliable ignition and safe operation. Designed to replace outdated models, this module connects easily with a cable for quick installation. Its primary function is to control ignition sequences, delivering a consistent spark for burner activity. It is compatible with a range of Rheem water heater models, ensuring versatility in replacement applications.

- Compatible with various Rheem gas water heaters
- Includes easy-to-install cable
- Delivers reliable ignition for efficient performance

Product Highlights

This ignition control module enhances the safety and reliability of gas water heating systems.

Product Information

Standard Information

- **Brand:** Rheem Water Heater
- **MPN:** SP10763C

Technical Specifications

- **Item Number:** SP10763C
- **Electrical Rating:** 24V
- **Dimension:** 6.2 inches (Length) x 4.4 inches (Width) x 4.3 inches (Height)
- **Weight:** 0.62 lbs
- **Wiring Connector:** Female 3/16 Inch
- **Use With Models:** 5AU61, 5AU62, 5AU63, 6E743, 6E738, 6UT21
