-----	--

# Years of experience, yet still as curious as kids.

At Franke, we have been looking for new solutions and innovations for over 100 years, and our attitude still has not changed. In 1911 we combined traditional craftsmanship, precision engineering and a constant pursuit of innovation, three principles that remain at our core.

## A story forged in Swiss precision

Our story began at the beginning of the last century as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke.

Since then, we have opened up to the world and inaugurated manufacturing facilities all around the globe. Which led us to become leaders in the kitchen sink segment, and home solutions altogether.

“We believe that sustainability means fairness to future generations.”

## Shaping our future

Preserving the environment, shaping the future. As a company conscious of our responsibilities, we think and act today in the interest of the world of tomorrow. We work hand-in-hand with our partners, customers and suppliers to create a livable future where people can also thrive.

“We believe that sustainability means fairness to future generations”— this quote from Michael Pieper, owner of the Franke Group, encapsulates our company ideals. We reconcile economics with ecology and make a proactive contribution to sustainable development — with long-lasting products, recyclable materials, and smart technologies. We use the global sustainable development goals and the United Nations Global Compact (UNGC) as a guide and framework on the path to a climate-neutral future.

### Putting people at the heart of our sustainability

The foundation of our new sustainability strategy rests on three pillars of the environment, employees, and the company. When it comes to environment, we focus on the production and life cycles of our products.

As the market leader, creating reliable and innovative solutions with real added value is both a challenge and a source of motivation.

This exceptional quality enables customers to use our products for more than two decades — conserving resources. We also feel an immense responsibility for our employees, of which there are approximately 8,700 worldwide. Words like appreciation and trust aren't just empty phrases to us; they're deeply embedded in our company's DNA.

We help people stay healthy and make their professional aspirations a reality. Franke is synonymous with diversity, equal opportunities, cohesion, and a company culture where people want to give their best and contribute their ideas.

# Good for everyone!

Good for our partners and customers.

Good for the planet. Good work.

We believe that sustainability means planning ahead.

We see environmental action as an opportunity, and this attitude is also reflected in Franke's products.

### Less plastic and better taste

Plastic bottles have a particularly stark effect on the environment — around the world, over 1,500 bottles end up in the sea every second. From our point-of-use faucets, the filter combines activated carbon and a high-tech membrane to reduce bacteria, lead, chlorine, residues, and sediment. Customers, therefore, have clean drinking water, which is equally good for their health and the environment.

### Saving water has never been so easy

Another star in Franke's range of faucet products is the water-saving feature. This innovative technology allows you to move the handle to a position that will reduce water flow by 50%. In addition, faucets equipped with Franke's ECO cartridge are designed to limit the flow and temperature of the water.

# FRANKE HOME SOLUTIONS

## Solutions that work together

Our kitchens are places to live: we cook there, eat there, and spend time together there, more often than not, all at the same time. Our products all merge together in functional systems aimed to facilitate your life and please your eye, thanks to perfectly matching colors, designs, and combinations. When everything comes together, it is easier to enjoy every moment.

### Food preparation areas

#### Faucets, sinks and kitchen accessories.

Award-winning, intelligent, eco-friendly faucets are perfectly paired with elegant, spacious sinks equipped with custom-fit accessories or other innovative tools, so you have everything you always need. Everything is manufactured in the best, most durable, and hygienic materials, for example, our stainless steel or exclusive granite.

### Filtration

#### Cold, hot and hot/cold combinations.

Every kitchen has specific needs, so we created a range of filtration faucets that dispense filtered hot or cold water. Franke filtration faucets are considered the blueprint for faucets that go the extra step by being compatible with most reverse osmosis systems.

NEW

# Faucets

Get to know the all-new angles of performance.

## Atlas Neo

The **Atlas Neo** kitchen collection is a modern, slim, seamless design that will look great in any kitchen and is the ideal match for any sink. The pull-out spray and contemporary spout can swivel for ample sink coverage. Made from top-quality stainless steel for years of durability. Don't stop with just the faucet. Make it a suite and add the matching filtration faucets that are compatible with reverse osmosis filtration systems.

## Active Semi-Pro

Sleek and functional. The **Active Semi-Pro** faucet is ideal for any style kitchen with a simplistic look. The pull-down spray can reach every corner of the sink, and the sprayer firmly connects back into place. Franke's Active faucets focus on elements from the eco-design, such as sustainable materials, quality, and durability, to deliver exceptional functionality and reduced environmental impact. Thanks to its built-in feature, the ECO Cartridge, the Active faucet range can limit the consumption of water and energy.

## Eos Neo

The Eos Neo faucets combine all the advantages of a modern faucet in a straight forward design: a high, rotating spout makes food prep and clean-up easy. Press the toggle switch, and water will divert from spray to stream. The pull-down spray easily extends to reach the entire sink. When finished, the sprayer glides easily back into place and locks firmly into place. The new Eos Neo faucets are built in solid, corrosion-resistant stainless steel and equipped with a 35mm cartridge for a highly functional, long-lasting experience. Add a filtration faucet that matches the finish and style and is compatible with reverse osmosis systems.

# Faucets to the highest standards

From extravagant to the purist. From industrial black to polished chrome. Whether you prefer a semi-pro, pull-out, or filtration, the Franke faucet range meets every kitchen's needs. Your favorite Franke faucet will perfectly match your ideal Franke sink.

## Stainless steel

Outstanding quality comes together during the Franke manufacturing process. Stainless steel material is used throughout the faucet, both inside and out. The interior stainless steel component's durability exhibits longevity that other materials cannot. Franke uses 100% lead-free stainless, so you can be assured it will not release into the water when it comes out of the faucet. The aesthetically pleasing look is corrosion and tarnish-resistant and has a naturally hygienic surface.

## Water saving feature

Conserve natural resources and trim your water bill with Franke's water saving feature. Move the handle to the first position for a water-saving 50% flow. Moving the handle to the second position allows for 100% flow. Look for faucets with the water saving feature icon, as not all faucets have this feature

## Quality assurance and certifications

Franke faucets are manufactured under the supervision and testing of local and international certifying bodies, including CSA, IAPMO, ICC, and NSF. All Franke faucets meet the requirements of the Federal Safe Drinking Water Act, NSF372, NSF61, AB100, and ASME A112.18.1\CSA B125.

## Make your statement

Franke offers a large selection of premium faucet materials and finishes to complete the design statement in your well-appointed kitchen. Complement or contrast your sink or appliances with one of 11 available finishes from Matte Black for a sophisticated, modern appeal to earthy Stone Grey or our NEW Gold finish to accent cabinetry and countertops.

Franke stainless steel faucets do not have a coating or finish. They are manufactured with durable 304 and 316 stainless steel resulting in a surface resistant to wear and abrasion and ensuring a lifetime of function and satisfaction.

NEW

# Icon

A legend in the making.

Combining contemporary design, inspired by nature plus a host of wonderful features, Icon is the perfect balance of aesthetics and functionality. The Icon pull-out and semi-pro faucets feature a Neoperl Laminar aerator to reduce splashing.

### Effortless control

The single handle lever controls the water flow as needed with a simple movement.

### Slim body and high spout

The high spout and sleek design with a 360 swivel spout offers plenty of space when working with large cookware. The pivoting sprayhead offers both stream and spray water flows.

# Pescara

Clean design and detailed craftsmanship.

The clean design and detailed craftsmanship make Franke's Pescara faucet line ideal for those who savor simplicity. Pescara faucets feature a level of functionality and performance that maximizes usability for the home chef or kitchen connoisseur.

## Flexible coil spring hose

Flexible metal spring hose allows maximum reach of the entire sink.

## Magnetic docking

An intuitive, quick release, magnetic dock holds the spray head securely in place when not in use.

## High performance spray

Move smoothly from spray to stream without the need to reduce water pressure between modes.

# Atlas

# Neo

Modern design, built to last.

**NEW**

The Atlas Neo stainless steel material gives you the benefits of high performance and low maintenance. The material is corrosion-resistant, scratch-proof, and stain-resistant. Stainless steel has a hygienic, non-porous surface that is resistant to bacteria and germs. This faucet will give years of performance and service, making it a perfect solution for everyday sustainability.

## Features and benefits

### Single side lever

The linear side lever functions well in a variety of installation configurations. It can be rotated through 0 to 180° for easy and precise adjustment of water flow.

### Pull-out spray

The pull-out head offers easy maneuverability for any cooking or cleaning task.

### Laminar aerator

High quality laminar aerators help to reduce the air in the water stream producing a consistent water flow that is non-splashing.

# Steel

The perfect stainless steel faucet.

The Steel faucets are built in solid, corrosion-resistant stainless steel and equipped with a 35mm cartridge for a highly functional, long-lasting experience. The single-lever handle offers you the exact amount and temperature of water in one twist.

## Features and benefits

### Full coverage swivel

The 360 degree swivel spout generates a full range of motion, allowing you the flexibility to reach almost any area of your sink. The tall arch design offers exceptional space for cleaning or filling large pots and pans.

### Dual function spray head

Delivering a more powerful stream thanks to the needle spray used, it is easier to rinse fruit and vegetables, as well as remove stubborn food from dishes. The stream can also reach every part of the sink, making it easier to clean.

### Complete collection

Complete the look with a Eos Neo filtration faucet.

Franke faucets also meet the water efficiency requirements of the California Energy Commission and the US Department of Energy.

# Active Faucet

Exceptional design, inside and out.

## Stylishly sustainable

**ECO Cartridge uses up to 50% less water**

Our Active faucets offer the best of both worlds — design and sustainability. With three design options, available in a range of stunning contemporary finishes, the appeal is obvious.

The secret to this performance is the environmentally beneficial ECO cartridge, which is designed to limit both the flow and temperature of the water.

ADA Compliant: Product is compliant with the American Disabilities Act when properly installed. All faucets can accommodate at least 1-3/4" countertop thickness. Several can accommodate up to 3". Call for additional thicknesses. Recommended Pressure Range: 15-75 PSI. All Franke filtration faucets have been certified to comply with NSF61NSF/ANSI/CAN 61: Q ≤ 1 and NSF372 drinking water system component requirements. All new Franke filtration faucets have been certified to NSF 58 for use with Reverse Osmosis filtration systems. These requirements meet California Health and Safety Code requirements for low lead (AB953) as well as the low lead requirements of the US Safe Drinking Water Act. Franke faucets also meet the water efficiency requirements of the California Energy Commission and the US Department of Energy.

# Eos Neo **NEW**

Modern clean lines.

The Eos Neo combines all the advantages of a modern faucet in a straightforward design: a high spout for cleaning vegetables and filling big pots easily. The single-lever mixer offers you the exact amount and temperature of water in one twist.

## Perfect water flow

The handle has a 0 - 90 degree movement for a perfect temperature and water flow control.

## Solid 304 and 316 stainless

The Eos Neo faucets are constructed with 304 and 316 stainless steel that is corrosion resistant inside and out.

## Pull-down spray head

The pull-down spray head can be used with stream or a powerful spray for more efficient cleaning.
