2022

A photograph of a row of white ceramic toilets in a showroom setting. The toilets are arranged in a line, receding into the background. They have a modern, clean design with a pedestal base. The floor is highly reflective, showing clear reflections of the toilets. The background is a plain, light-colored wall. The overall lighting is bright and even.

WATER CLOSETS

EXTRA LARGE 3" FLUSH VALVE

50% larger than conventional valves

PRECISION RIM JETS

Computer-designed positioning to optimize bowl cleaning

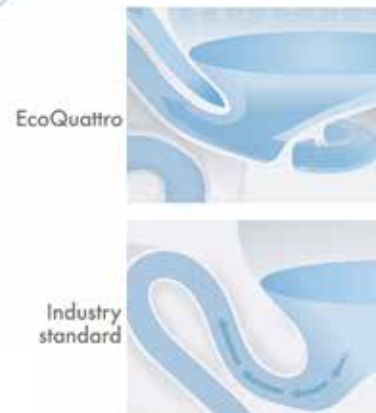

LARGE GLAZED TRAPWAY

28% larger than industry standard and designed to virtually eliminate clogging

DIRECT-FED WATER JET

Delivers maximum water force providing exceptional waste removal

WATER-SAVING TECHNOLOGY

EcoQuattro is the most advanced flushing system on the market today. Designed for extraordinary flushing performance, it addresses the environmental efficiency and poor performance issues long associated with the use of 1.28 gallon water closets in the home. Best of all, EcoQuattro uses 20% less water than traditional 1.6 gallon models.

SILENT CLOSE SEATS

QUIET, SLOW CLOSE LIDS

Whether replacing a toilet seat or an entirely new toilet, you'll want to be sure you have the latest in seat technology. All Icera toilets come equipped with Silent Close seats, eliminating noisy seat slamming once and for all.

QUICK-RELEASE SEAT HINGES

For even greater convenience, all Icera seats come with a Quick-Release mounting. With the touch of a button, the seat comes off for easy cleaning of the bowl deck.

DESIGNER HARDWARE

Designer toilets deserve designer accessories. Icera offers tank levers in a variety of metal finishes that are solidly constructed and specially designed to fit any bathroom environment.

RIMLESS FLUSH SYSTEM

Select Icera models feature the Rimless Flush system. Large twin jets and an open rim enable significant volume of water to fall directly into the bowl, maximizing washing force. The open rim makes for much easier cleaning, compared to conventional toilet bowls with holes around the rim – no more stains building up around and inside the rim. Especially useful in hard-water environments.

Look for the  symbol next to models featuring the Rimless Flush.

CADENCE C-6270

1.28gpf, Compact-Elongated, Skirted Trapway

INCLUDED COMPONENTS

- F-73 Trip Lever (Polished Chrome)
- S-232 Silent Close, Quick-Release Seat
- Fill valve, Flush valve & Flapper
