

**Ventinox®**

**Welded, flexible relining for  
masonry chimney.**

**UL 1777 and ULC S635.**

## Specifications

### Applications

VFT flexible liners are used for upgrading or restoring masonry chimneys that vent Category I natural gas, propane or oil appliances, wood or pellet stoves, fireplaces and fireplace inserts.

VG flexible liners are top performers when used to line masonry chimneys venting Category I gas-fired boilers, furnaces, space and water heaters.

### Materials and Construction

VFT Single-wall, .006" 316 stainless steel. Continuous weld delivers a strong, air and water tight flue gas conduit.

VG Single-wall, .006" AL29-4C stainless steel. Continuous weld construction.

### Clearances

VFT 0" clearance to masonry chimney for oil and gas. With TherMix or ProFoil insulation 0" clearance for solid fuels.

VG 0" clearance to masonry for gas appliances.

### Diameters

3"-12"

### Listings

UL Listed to UL 1777 and ULC S635 (MH11476).

## UL 1777 and ULC S635 Systems

# Ventinox<sup>®</sup>

## Liner For Life

Ventinox VFT, made from 316Ti stainless steel, can withstand high temperatures associated with solid fuel fired heaters, as well as the corrosive environments typical in gas or oil vents. Tested and listed for all-fuel, and can also be used for wood, gas, or oil-fired equipment.

Ventinox VG is the ultimate choice for venting gas fired appliances, where highly corrosive condensate formation (hydrochloric acid) within the flue is likely. The super-ferritic AL29-4C stainless steel alloy exhibits extreme resistance to chloride pitting, crevice, and stress corrosion and cracking.

Ventinox components are made from either 316SS (VFT) or super-ferritic stainless steel (VG). Components feature an integral locking band, avoiding the use of pop rivets. Liners and components provide a penetration free top to bottom connection.

When venting solid fuel heaters, Ventinox VFT must be insulated with either TherMix or ProFoil blankets to meet UL 1777 requirements. For all other applications, insulation is highly recommended for increased efficiency and draft performance. See the end of the DuraFlex SS for the insulation section to find information on our offering: TherMix, ProFoil, AluFoil Tape and ProMesh.

## Typical Installations

'updated installation key'

Gas Furnace

Gas Stove

Fireplace Insert

Open Fireplace

### Installation Key

1	Rain Cap w/ Storm Collar
2	Top Cover Plate
3	Flex Length
4	Tee with Removable Snout
5	Sleeve
6	Rigid Type B Gas Vent or Rigid Pipe Length
7	Adjustable Elbow
8	DuraFlex Appliance Adapter
9	Bottom Plate w/ Collar
10	ProFoil w/ProMesh or Thermix

Refer to our Typical Venting Installation drawings to select the appropriate component parts for your installation.

## Planning Your Installation

1	Verify the venting requirements of the appliance used. Choose the liner system appropriate for the appliance and installation. Note: VFT is recommended for all fuels and VG is the best choice for gas.
2	Refer to the Typical Installations for the type of liner installation similar to your situation. Identify the needed parts for installation.
3	Venting for a fireplace requires the correct liner size for proper drafting. The size of the liner should match the outlet size on the appliance.
4	Determined the length of the liner needed.
5	If connecting two or more appliances to a common vent, be sure to connect the higher BTU appliance below the lower BTU appliance.
6	Make sure of a proper fit for the top plate of the relining to provide a secure, leak-proof installation.
7	If a free standing appliance is used, select the vent or stovepipe pieces to connect from the appliance to the liner (refer to the appropriate DuraVent Catalog Section).
8	Important! Check to be sure the installation complies with all local and national code requirements, including clearances to combustibles. Contact the local building inspector for permit requirements.

## Ventinox® Kits

### Ventinox VFT Kit w/out Tee

Includes Ventinox VFT Liner, Top Plate, and Rain Cap with Storm Collar. Choose diameter and length needed.

### Bottom Plate w/ Collar

Attach to bottom of liner in the smoke chamber of a fire place, then pull up to form a seal between the liner and clay tile.

SIZE	ORDER #	STOCK #	A x B
6"	6VFT-BP	810001696	12" x 13"
7"	7VFT-BP	810001727	12" x 13"
8"	8VFT-BP	810001751	12" x 13"
9'	9VFT-BP	810001774	14" x 16"

### Offset Slide Adapter

Use as a horizontally adjustable connector between a liner and top flue outlet of a heater. Adds up to 5" of offset.

SIZE	ORDER #	STOCK #	A
6"	6VFT-ADSL	810001697	2 3/4"
8"	8VFT-ADSL	810001752	3 1/4"

### Installation Cone

Use with a rope to pull liner through offsets in masonry chimney. Twists into liner.

## Sealing Kits

VSK Damper Sealing Kit

VCK Connector Sealing Kit

Use to seal damper. The VSK Damper Sealing Kit rests on top of the fireplace damper frame and seals the area around the Oval Flex Connector. Kit includes 2 panels, cross-bars to tighten against the damper frame for a secure fit and wing nuts. Fits up to 49" wide dampers. The VCK Connector Sealing Kit fits underneath the damper frame and seals the area around the Oval Flex Connector. Kit includes 2 plates, an insulation panel, support bars with hardware, connector and wing nuts. First up to 48" wide dampers.

SIZE	ORDER #	STOCK #
6"-10"	6VFT-VSK	810001610
6"-10"	6VFT-VCK	810001609

## VG Universal Take-off

Use to connect additional appliances into a common vent.

SIZE	ORDER #	STOCK #
3"	3VG-UTO	810001833
4"	4VG-UTO	810001841
5"	5VG-UTO	810001849
6"	6VG-UTO	810001858

### 3"- 4" Pellet Step Increaser

Use to connect 4" diameter Ventinox flex to a 3" diameter pellet insert.

SIZE	ORDER #	STOCK #
4"	3VFT-X4	810001645

### VG Increaser/Reducer

Use to increase or decrease vent diameters . Additional sizes available through special order.

SIZE	ORDER #	STOCK #
6" - 5"	5VG-X6	810001850
7" - 8"	7VG-X8	810001867
9" - 8"	8VG-X9	810001875
7" - 6"	7VG-X6	810001859

### Round Insert Boot

Use to connect inserts with either rectangular or round flue collars to 6" or 8" liners. Made from 11 gauge carbon steel.

SIZE	ORDER #	STOCK #
6 1/2"	6VFT-RB	810001698
8 1/2"	8VFT-RB	810001753

### Oval Insert Boot

Use to connect inserts with 5" to 8" round flue collars to 8" Oval Flex Connectors. Made from 11 gauge carbon steel.

SIZE	ORDER #	STOCK #
8"	8VG-OB	810001876

## Oval Adjustable Insert Boot

Use to connect inserts with rectangular flue outlets to Oval Flex Connectors. Top plate can point straight up or back towards the damper. Made from 11 gauge carbon steel.

SIZE	ORDER #	STOCK #	A
8"	8VFT-OB	810001754	11"
10"	10VFT-OB	810001789	14"

## Round-to-Oval Adapter

Use as a drip-free connection between a oval liner and Round Flex Connector.

SIZE	ORDER #	STOCK #
6" x 6"	6VFT-6ADRO	810001699
6" x 7"	6VFT-X7ADRO	810001700

# Insulation

## TherMix

Use to fill space between a liner and inside masonry chimney. Ready-mix formula cures into lightweight, semi-hard mass that insulates the liner and dissipates the intense heat created in a chimney fire.

\*Use Table 1 to estimate the number of TherMix bags or boxes needed to do the job.

- Find the flue opening that comes closest to the one being lined, the left hand column.
- Find the size of the liner to be installed across the top line.
- Where the values intersect, read the cubic foot volume of TherMix per foot of chimney height.
- Multiply this volume by the height (in feet) of the chimney.
- Divide the cubic feet calculated in the previous step by 3.25. This answer will determine the number of bags/boxes of TherMix needed.

SIZE	ORDER #	STOCK #
BAG	RNS-TMG	810001820
BOX	RNS-TMX	810001821

### Example:

A 28' chimney with a flue opening of 8.5" x 8.5" is to be lined with a 6" liner. As shown in Table 1, .30ft<sup>3</sup> of TherMix is needed per foot of chimney height. Multiply .30 by 28 (the height of the chimney), to get 8.4ft<sup>3</sup>. Now divide 8.4 by 3.25 (the approximate volume yield per bag of TherMix), to obtain 2.6 bags/boxes of TherMix to complete the installation.

\*Masonry chimneys are not uniform structures. Have extra bags/boxes available in case you need them. If there is an installation not covered by table 1, refer to the formula below:

$$\text{Packages of TherMix} = \frac{(W \times D \times H) - (CS \times H)}{1728 \text{ cu. in.}} \div 3.25$$

- W = Width of flue opening (in inches)
- D = Depth of flue opening (in inches)
- H = Height of flue (in inches)
- CS = Cross Section areas of chimney liner (table 2)

TABLE 1: THERMIX VOLUME PER ONE FOOT OF CHIMNEY HEIGHT

## ProFoil

Use as insulator for stainless steel liners in masonry chimneys. UL Listed insulation. Size is based on vent diameter.

Required to insulate stainless steel liner to meet UL 1777 when proper clearances to chimney and framing are not available. 1" clearance from SS liner to interior wall of the masonry chimney and 1" clearance from the masonry to the house framing are required in order to meet UL 1777. If you do not have either of these clearances then a ½" wrap is required. If these two clearances are available then no insulation is needed. AluFoil Tape and ProMesh required.

# What makes us different from the rest?

Ventinox: The optimum in safety and performance for flexible lining.

Ventinox Feature	Benefit	Ventinox Feature	Benefit	Ventinox Feature	Benefit
Lifetime Warranty	The best Warranty in the industry. DuraVent provides 100% warranty for the lifetime of the product. Gives the installer and homeowner the greatest peace of mind in a quality installation.	316Ti Stainless Steel	Ventinox VFT can withstand high temperatures, the corrosive elements and sulfuric acid exposure. Exhibits good pitting resistance.	0" Clearance	VFT has a 0" clearance to masonry chimney for oil and gas, and with Thermix or ProFoil insulation, 0" clearance for solid fuels. VG has a 0" clearance to masonry for gas appliances.
Welded Spiral Corrugations	Continuously welded spiral corrugations renders Ventinox air and water tight while providing superior strength and excellent flexibility. Welded design eliminates adding a silicone seal in the field at the seams.	AL29-4C	Ventinox VG can withstand highly corrosive condensates and exhibits extreme resistance to chloride pitting, crevice corrosion, stress corrosion and cracking.	Heat absorption	Steel is known to expand when exposed to heat. Ventinox absorbs any expansion in its corrugations and does not twist or grow in length.
Lightweight	The continuously welded stainless steel strip acts as a backbone and produces a lightweight liner 20% stronger than its competitors, resisting crushing and tearing.	Integral locking band	Components feature an integral locking band, avoiding the use of pop rivets and the need for pre-drilling liners.	U.S. made since 1979	Proven to be safe and effective in thousands of American homes since 1979 and recognized and approved by home-heating experts and building code officials.
				VFT Extensions	Use as an economical solution to add a few extra feet when needed to complete a run.
