

Ultra Thin Cut-Off Wheel, Stainless

.032" Thick Wheel is 20% Thinner Than Most Competitor Wheels

EFFICIENCY

.032" thick for faster cutting and reduced material waste

PRECISION

60 grit abrasive for cleaner cuts

VERSATILITY

Zirconia Aluminum construction makes these wheels ideal for ferrous metals including stainless steel

INNOVATION

Ultra thin design requires less energy for improved battery life when used with cordless grinders

FEATURES

- .032" thick wheel is 20% thinner than most competitor wheels
- .032" thick for faster cutting and reduced material waste
- 60 grit abrasive for cleaner cuts
- Zirconia Aluminum construction makes these wheels ideal for ferrous metals including stainless steel
- Ultra thin design requires less energy for improved battery life when used with cordless grinders
- For making cuts in metal and stainless steel pipes, sheet, and channel
