

# WORKSKIN™

Staying dry and comfortable while working is critical for productivity. MILWAUKEE® WORKSKIN™ solutions include cold and warm weather garments engineered to regulate temperature. Custom yarns and fabrics, designed to be worn next-to-skin, accelerate sweat wicking to stay dry. These performance layers are developed in collaboration with feedback from real users across the trades through continuous jobsite research.

**BUILT TO FIGHT SWEAT.**  
TRADE FOCUSED.

# FREEFLEX™

Movement is essential on the job. MILWAUKEE® FREEFLEX™ workwear is designed to provide enhanced range of motion with materials that are purposefully engineered for stretch and flexibility. Custom construction features, such as gussets and seam design, enable users to move freely and comfortably while working. These technical movement garments are developed in collaboration with feedback from real users across the trades through continuous jobsite research.

**BUILT FOR MOVEMENT.**  
TRADE FOCUSED.

# GRIDIRON™

Surviving the demands of the jobsite is hard work. MILWAUKEE® GRIDIRON™ workwear is engineered for best-in-class durability without sacrificing on mobility and comfort. Designed with long-lasting fabrics and intentional reinforcements in high-wear zones, GRIDIRON™ workwear is BUILT TO SURVIVE. These hard-working garments are developed in collaboration with feedback from real users across the trades through continuous jobsite research.

**BUILT TO SURVIVE.**  
TRADE FOCUSED.
